ReCoat Shopping Carts

ReCoat your current fleet of shopping carts to look and perform like NEW!

National Cart can take your old carts and make them look and perform to the quality and standard of NEW carts, for almost HALF the price! With our proven 8-step process, the life of your current fleet of carts can be extended for up to 7 more years!

- Extend the life your carts up to 7 years, for half the price of NEW!

- Recoated carts support green initiatives and decrease your carbon foot print.

- Recoated carts appear, perform, and are warranted as new for one full year.

- NCC has an inventory of recoated carts in stock if additional carts are needed for your store.

FROM OLD TO NEW!

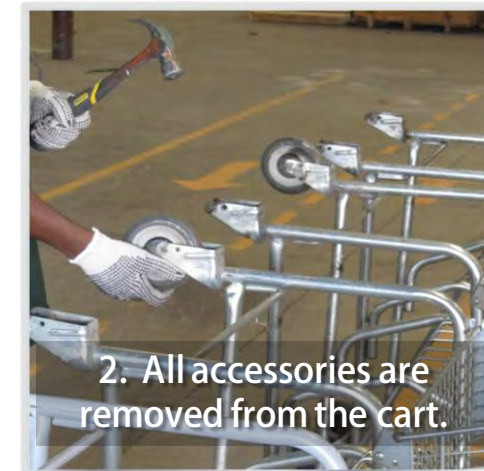

Independent testing performed by Global Testing Services Inc. Kokomo, IN (report available for review)

Our 8-Step Process Provides You Shopping Carts SAFER, BETTER, FASTER!

1. NCC first transports your old carts from your facility to ours, in St. Charles, MO.

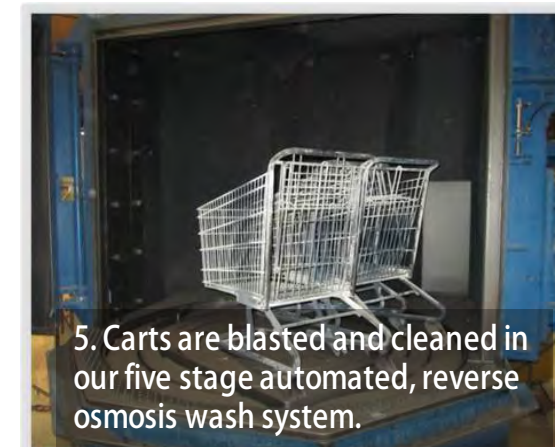

2. All accessories are removed from the cart.

3. Broken welds and wires are repaired to the highest quality.

4. Carts are dipped in a heated, fluidized, sand bed that removes the original powder coating, as well as any other material that adhered to the finish.

5. Carts are blasted and cleaned in our five stage automated, reverse osmosis wash system.

6. The prime coat of powder-coating is first applied. Then a high-gloss top coat is chemically bonded.

7. The cart is accessorized with new casters, wheels, handles, bumpers, baby seats and locking devices.

8. The remanufactured carts are inspected and shipped back to your store.
